

HOW TO MAKE A TELEPHONE CALL

Abadata Connect Customer Training Guide

Making a call is easy. You can dial the number first and then place the call, or pick up the handset and dial. Abadata Connect will normally place the call automatically after the dialing timer expires.

1. PLACE A CALL

1	Dial the extension or telephone number you want to call.
2	To place the call immediately, press # at the end of the dialing string.
3	You can also press the Send or Call button on the phone display.
4	If you do neither, the phone will wait for the dialing timer and then place the call automatically.

QUICK TIP - SKIP THE 4-SECOND TIMER

After dialing the number, press the # **sign** to immediately place the call.

Example: Dial 989-883-3411#

The **Send** or **Call** button on the display does the same thing.

2. TWO EASY WAYS TO DIAL

Dial First	Dial the extension or telephone number while the handset is still down. Then press #, Send , or Call . Pick up the handset if you want to use it for the conversation.
Handset First	Pick up the handset, then dial the extension or telephone number. Press #, Send , or Call to place the call immediately.

REMEMBER

You do not have to wait for the 4-second dialing timer. After entering the complete number, simply press #, **Send**, or **Call** and your call will be placed immediately.
